PROFESSIONAL SUMMARY

Highly motivated and passionate software developer with proven experience implementing software and DevOps solutions. My work has spanned a broad spectrum of tasks — from designing and writing software for embedded, mission-critical real-time systems to creating and optimizing CI/CD pipelines and writing Helm charts for Kubernetes applications. I am currently seeking my next role as a software developer or DevOps engineer, where I can apply my skills and contribute to high-quality software design and development.

SKILLS

- Programming in C++ and Python
- Designing and implementing complex real-time systems
- Scripting: Bash, Python
- Kubernetes and OpenShift — container orchestration
- Writing Helm charts (with different deployment strategies)
- Microservices architecture and SaaS provisioning
- Creating and maintaining CI/CD pipelines (Jenkins, GitHub Actions)
- Container runtime engines (Docker, Podman, containerd)
- Provisioning and maintaining Kubernetes clusters (RKE, Rancher, OCP, K3s)
- Provisioning and managing private container and dependency repositories (JFrog, Harbor, Sonatype Nexus)
- Monitoring: Prometheus, Grafana, Datadog
- Provisioning and maintaining cloud services (AWS, Linode, DigitalOcean, Oracle Cloud)

WORK EXPERIENCE

Software Developer

Feb 2025 – Present

SkySoft Solutions, Yokne'am Illit

- Designed and wrote new features for mission-critical real-time systems in C++.
- Debugged and upgraded systems built on proprietary legacy libraries.
- Designed support applications to implement requirements from the Interface Control Documents (ICDs).
- Assisted in enhancing the project's CI/CD design and process.

DevOps Engineer

Aug 2023 – Feb 2025

Commit, Petah Tikva

- Characterized and implemented cloud and DevOps solutions with a focus on CI/CD pipelines and Helm charts for Kubernetes applications.
- Wrote engineering documents detailing complex cloud configurations, emphasizing automation, monitoring, and performance.
- Managed and upgraded customer systems and delivered diverse projects with ongoing post-deployment support.
- Assisted development and integration teams.
- Deployed and managed microservices on Kubernetes for SaaS customers, including environment provisioning, onboarding, and integration of SaaS monitoring tools (Datadog, Grafana, Prometheus).

Integration Specialist

Nov 2021 – Feb 2023

Israel Aerospace Industries

- Configured and maintained AIX Unix servers, airborne computers, and electronics systems.

EDUCATION

Electronics Practical Engineer

2017

Air Force College, Haifa

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
